U.S. ARMY INTELLIGENCE AND SECURITY COMMAND

The U.S. Army Intelligence and Security Command (INSCOM) performs worldwide multidiscipline intelligence, security, and electronic warfare operations.

The command concentrates on collecting and disseminating intelligence of interest to its users. INSCOM provides technical advice and assistance on training and use of intelligence and electronic warfare forces assigned to the various corps, divisions, and brigades.

INSCOM's most valuable assets—its people—are devoted to performing the mission. There are both military and civilian personnel working for INSCOM. About half of INSCOM's personnel work overseas.

Most of INSCOM's subordinate units are located at vantage points throughout the world. They perform missions that relate to intelligence, counterintelligence, and operations security. In the field of communications and electronics, field stations are located in Germany, Turkey, Panama, Japan, Korea, Texas, Hawaii, and Florida.

Military intelligence brigades and groups operate worldwide providing multi-source intelligence and security support designed to counter all-source intelligence threats to U.S. Army activities. These units are located in Germany, Panama, Japan, Korea and the United States. The Headquarters for the command is located at Fort Belvoir, Virginia.

YOUR CAREER

Choosing a career is one of the most important decisions you'll ever make. If you choose your career wisely, you will regard your work as useful, important, and personally rewarding.

Whether you are just starting out or are in the process of reevaluating your present career status, you are probably aware that many factors have to be thought through honestly and intelligently before making that all-important decision.

Choosing a career wisely involves knowing yourself and your capabilities plus an awareness of what is happening in the job market. Knowing where and for whom you would like to work, as well as the prospects for continued personal growth and professional development, is important.

We invite you to see what the U.S. Army Intelligence and Security Command has to offer in the way of civilian career opportunities. Within this pamphlet, you will find descriptions of a variety of career opportunities.

Military intelligence has played a key role in every society since the beginning of recorded civilization. While methods have been improved and modified, the basic philosophy of collecting information—analyzing it for value and disseminating it for use in planning—has not. Since civilization began, a nation's survival—more often than not—has depended on its leaders having accurate information about foreign powers and military threats.

CAREER OPPORTUNITIES IN INSCOM

INTELLIGENCE SPECIALIST:

Perform highly technical work in the collection, evaluation, interpretation, and dissemination of information pertaining to intelligence operations and research, which directly or indirectly affects national security.

COMPUTER SPECIALIST:

Coordinate and integrate various functions which contribute to the design and operation of an information system to ensure that the necessary computer information is produced in a timely and correct manner.

COMPUTER PROGRAMMER:

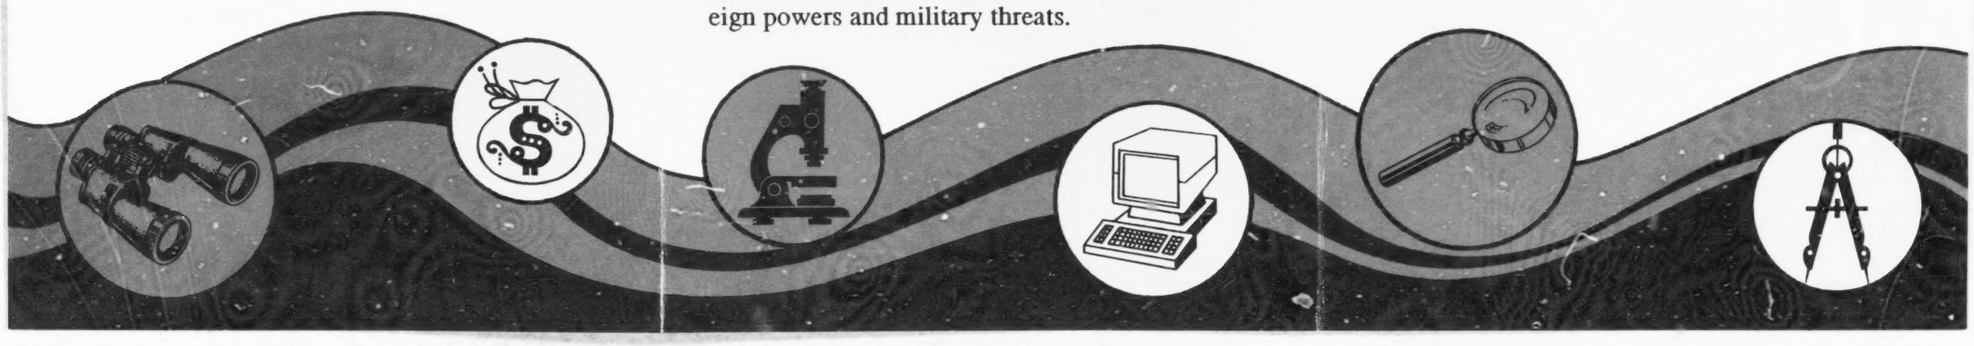
Apply detailed knowledge of a programming "language" and of computer technology to develop, test, and maintain the detailed instructions which guide the operations of the computer.

COMPUTER ANALYST:

Prepare "specifications" from which the computer programmer prepares the computer instructions. The analyst applies a more general knowledge of computer languages and capabilities and a detailed knowledge of the information required by a customer to develop a computer based system efficiently.

SECURITY SPECIALIST:

Develop, implement and evaluate policies and procedures designed to protect information, personnel, and property from unauthorized disclosure, misuse, theft, espionage, sabotage, or loss.



ACCOUNTANT:

Develop, examine, and interpret accounting statements, design accounting systems, and audit accounts.

BUDGET ANALYST:

Plan, develop, formulate, present, defend, execute, and review the annual budget and carry out program/budget guidance and policies of the agency.

MANAGEMENT ANALYST:

Evaluate resources and missions to determine organizational effectiveness and efficiency and to develop better, faster, simpler, and cheaper methods for accomplishing assigned missions.

PROCUREMENT ANALYST:

Study market conditions and prices, review information regarding the capabilities, financial condition, management efficiency and reliability of performance of certain businesses and industries, and provide advice on pricing, costs, and bid proposals.

OTHER CAREER OPPORTUNITIES:

- Communications Specialist
- Logistics Management Specialist
- Polygraph Examiner
- Intern Programs
- Intelligence Aid and Clerk
- Secretary and Clerk Typing
- Management Assistant
